ABOUT ME

Detail-oriented and motivated AI & DevOps enthusiast with a strong foundation in Python, cloud infrastructure, and modern AI systems. Passionate about building intelligent applications using LLMs, Retrieval-Augmented Generation (RAG), and scalable DevOps practices. Continuously learning and implementing cutting-edge technologies to solve real-world problems.

PROJECTS

- Developed AI-powered agents using RAG and LLM architectures for automation and intelligent data retrieval
- Built and deployed containerized applications using Docker and Kubernetes
- Implemented CI/CD concepts and infrastructure automation using Terraform and ArgoCD
- Worked on semantic search systems using embeddings and vector databases

AI Agentic Projects

Advanced Laptop Agent

<https://github.com/Shazil91/laptop-agent.git>

Simple RAG Agent

<https://github.com/Shazil91/laptop-agent.git>

DevOps Projects

Advanced Chat Application Deployment

<https://github.com/Shazil91/chattingo.git>

React Django Demo App

https://github.com/Shazil91/react_django_demo_app.git

Health Checks Monitoring Project

<https://github.com/Shazil91/healthchecks.git>

SKILLS

AI & Agentic Engineering

- Python
- LLMs & Prompt Engineering
- Retrieval-Augmented Generation (RAG)
- LangGraph (Learning)
- FastAPI (Basic)
- HuggingFace Transformers
- Vector Databases (Qdrant)
- Semantic Search & Embeddings
- Multi-Agent Systems

DEVOPS & CLOUD

- Linux
- Git & GitHub
- Docker & Kubernetes
- Terraform
- ArgoCD
- Computer Networking
- Monitoring: Prometheus & Grafana
